# ACE LIMOUSINE (BUS)

## ACCESSIBILITY FEATURES OVERVIEW

Prepared  
**DECEMBER 2025**

## ACE Limousine

This document provides an overview of the existing accessibility features available on accessible buses operated by ACE Limousine in support of accessible transportation services in Philadelphia, PA.

The accessibility features described in this report are based solely on information supplied by ACE Limousine. No independent vehicle inspection or verification was conducted, and all conclusions are dependent upon the accuracy and completeness of the data provided.

## KEY FEATURES

### General

- Well illuminated, contrasted destination / route signs located on the front of the bus
- Service animals are allowed without proof
- The vehicle windows provide a clear view and good outward visibility
- Considerate and helpful staff
- Staff (drivers) receive accessibility training

## Boarding

- The walk up entry is 28 inches wide
- The accessible ramp lift door is 40 inches wide
- Audible warnings are provided to announce the opening and closing of vehicle doors.
- Available handrails to board and inside the vehicle
- Accessible means of boarding (ramp, lifting platform)
- The ramp is 32 inches wide, the slope is 8 degrees
- The capacity of the lifting platform is 800 lb
- The lifting platform can accommodate persons using walkers, crutches, canes or braces or who otherwise have difficulty using steps
- The lifting platform is equipped with handrails on both sides
- The lifting platform is 32 by 48 inches

## On board

- The diameter of the turning space allocated within the vehicle for wheelchair users to maneuver and turn around is 60 inches
- The vehicle has designated priority seating for passengers with disabilities
- The priority seating is clearly indicated with signs or universally recognized graphic symbols
- The vehicle has designated wheelchair spaces for passengers in wheelchairs or other mobility aids
- The designated wheelchair spaces are indicated with International Symbol of Accessibility
- The size of the designated wheelchair space is 30 by 48 inches
- The securement system can be easily attached by a person familiar with the system and mobility aid and having average dexterity
- The lighting is sufficient to facilitate sign language, lipreading and awareness of changes in level or slope
